

Uptown West Neighbourhood Transportation Study

NOTICE OF PUBLIC OPEN HOUSE #2

Study Objective

“To preserve the neighbourhood streets against potential traffic infiltration and safety issues due to growth, whilst recognizing the City’s strategic plans and approved policies on transportation”.

Public Consultation

The first Public Engagement Session was held on October 30, 2013. The study team met with the community to understand the transportation issues and concerns for the neighbourhood, as well as to find out which transportation solutions might best address them. Based on a technical review of the data and issues, and the outcome of the Public Engagement Session, the study team has developed alternative network scenarios with input from various City staff, technical agency committee representatives, and members of the Public Task Force.

Study Area:

You are invited to attend a **Public Open House** on Tuesday, May 6, 2014, where the alternative transportation scenarios will be available for review. You are welcome to arrive anytime between 6:00 and 8:00 PM to this drop-in session to review the scenarios and discuss them with members of the study team.

Details of the **Public Open House** are as follows:

Date: Tuesday, May 6, 2014

Time: 6:00 PM to 8:00 PM (drop-in format)

Location: Knox Presbyterian Church, 50 Erb Street W, Waterloo

Uptown West Neighbourhood Transportation Study

The alternative scenarios will be made available on the project website to provide you with the opportunity to give these alternatives some consideration. To best capture the input of the whole community, including those who may not be able to attend the Public Open House, an **online survey** has been developed to help the study team gather information on how these alternative solutions are perceived by neighbourhood residents. The alternative scenarios and this short survey can be accessed at www.waterloo.ca/uptownwest between **April 29 and May 13, 2014**.

If you require any additional information, please visit our study website at www.waterloo.ca/uptownwest, or contact either of the study team members listed below:
