GPS Coordinates for Site Locations
(Project Information Form Number P066-0241-2015)

Six archaeological sites were observed during the Stage 1 and 2 assessment of the property, and were identified as Locations 1 to 6. One of the six sites, Location 4, was registered in the Ontario Archaeological Sites Database as site AiHd-168. The attached map shows the location of each site within the development plan.

The site locations were mapped and their position was recorded using a Global Positioning System (Garmin Etrex) with an accuracy of better than 7 metres. The sites are located within Universal Transverse Mercator Zone 17. North American Datum 1983 was used. No method of correction was used and there were no conditions that may have affected the accuracy of the GPS readings.
